EDUCATION

bachelor of Engineering in computer science

Poojya Doddappa Appa College of Engineering, Kalaburagi, Karnataka, India

09/2021 - 07/2025

12th-PUC in Science

shree guru independent PU college kalaburagi karnataka

05/2019 - 03/2021

WORK EXPERIENCE

Intern Engineer

CraftySogo

01/2025 - 07/2025

Achievements/task

- Worked closely with team members to provision and secure AWS infrastructure (EC2, S3, RDS, Route 53, IAM), ensuring smooth cloud operations and faster project delivery
- Provisioned AWS infrastructure (EC2, S3, Route 53, CloudFront, RDS) using **Terraform IaC**, enabling global content delivery with 30% faster load times.
- Implemented **Prometheus** and **Grafana** for real-time monitoring and alerting on EKS clusters, reducing incident response time by 25%.
- Configured secure **AWS IAM roles** and **policies**, ensuring compliance and protecting sensitive health data for a chatbot-based recommendation system.

AI/ML Engineer

Roomain Technologies

09/2024 - 01/2025

Achievements/Tasks

- Build a Real-time Social Media Analytics Pipeline that helps advertisers to market their product based on current trends.
- Multi-Modal Customer Support Agent – Airline Industry Designed and developed a multi-modal AI-powered customer support agent with an intuitive user interface to assist airline passengers.

SKILLS

languages :- Python, Java, JavaScript

DevOps :- AWS, Docker, Jenkins, Terraform, EKS

AI/ML :- Transformers(Hugging Face), OpenAI API, RAG

Tools :- Git, GitHub, Postman, Power BI

Database :- MySQL, MongoDB

Soft Skills :- Adaptability, Teamwork, Communication, Problem-Solving

PERSONAL PROJECTS

MediAssist - AI-Powered Health Recommendation System (01/2025 - 05/2025)

- Developed "MediAssist", a medical recommendation system with an **AI-powered chatbot**, that analyzes user symptoms using ML algorithms and NLP to provide personalized health suggestions. Focused on improving healthcare accessibility, user interaction, and data privacy.

EKS Application Deployment with Monitoring (02/2025 - 03/2025)

- Deployed a scalable application on an **Amazon EKS cluster**, implementing **Prometheus** metrics and **Grafana dashboards** for real-time performance monitoring, with configured alerting mechanisms to proactively address system issues, ensuring high reliability and operational efficiency.

MirrorMind – AI That Thinks Like You (08/2025 - 07/2025)

- Developed "**MirrorMind**" a personalized language model that mimics individual communication styles by learning from WhatsApp and Telegram chat data. Utilized **Transformer architecture**, **LoRA** fine-tuning, and NLP preprocessing to replicate tone, vocabulary, and conversational patterns. Focused on achieving human-like personalization, emotional context understanding, and natural dialogue flow.
